28 YEARS MARINEPOOL

Adrenaline, innovation and continuously pushing the limits along with the natural elements are as much part of sailing as tradition, aesthetics and pure excitement. Extremes attract – sailing and maritime clothing attract.

About the joy of sailing – or how to turn your hobby into your job which doesn't leave much time for sailing any longer. The brand was created by German sailors Gerhard & Stefan Eberle and Robert Stark in 1991, true to their credo made by "sailors for sailors". Ambitiously, the friends chose the globe for their logo, clearly indicating their goal of building an international brand. The three guys from Munich took up the challenge and what seemed tilting at windmills in early days turned into a success story. The company and the Marinepool brand grew and went international.

The global success of Marinepool can be attributed to several factors. One element are the three founders, who are totally different characters and complementing each other at the same time. Different points of view and approaches focused on a common goal are key to success. The support of countless friends, yacht clubs, sailing federations and world class athletes from all over the world is another vital part. Last but not least, the most important success factor is the Marinepool team. Our staff that lives our spirit and who are the soul of Marinepool. Without their commitment, loyalty and their drive Marinepool would not be where we are today.

However, the increasing demand for "après-sailing clothing" as well as team and corporate wear soon led to a full product range including technical fashion and lifestyle wear. Today, the extensive product portfolio represents the founder's original purpose.

The brand is ranging from a new innovative dinghy collection to foul weather gear offshore sailing clothing as well as to a impressive crew wear for grand prix racing and superyachts. Marinepool offers the perfect sailing gear for any sailing activity – meeting the various demands. Additionally, Marinepool proposes outdoor products, technical fashionable clothing for sailing and other water sport activities, as well as fashion collection for women, men and children with a unique maritime style showing the typical Marinepool handwriting.

MARINEPOOL | DESIGN. TECHNOLOGY. PASSION.

Marinepool actively supports many high profile projects and campaigns and is the official clothing supplier to world-class teams, events and event series in sailing and power boating such as GC 32 Racing Tour, Oman Sail, Spindrift racing, SFS Team as well as the national French Sailing Team (FFVoile) and Austria (ÖSV) and last but not least, the world's fastest racing yacht, the Maxi Trimaran, Spindrift 2.

Pabrice Amédéo, both journalist and passionate sailor, has chosen to give up his of office job to live his dream: to sail the great ocean races and to sail solo and non-stop around the world.

With his skills and experience in off- shore racing, he is an allrounder, equally at ease among crews or sailing single handed. He has 7 trans-Atlantic races under his belt and was competing in the double handed Transat Jacques Vabre with Eric Peron, when this catalogue went into print.

In late 2015, Fabrice finished in eighth place in the Transat Jacques Vab-

got over competing in the Volvo Ocean Race. With this extensive experience he took part in the Everest of the seas on 6th November 2016!

The Vendée Globe is arguably the toughest sailing race in the world and in theory an utterly simple affair.

A regatta around the world, for single-handed sailors, without any stopover. France to France, leave Antarctica to Starboard. That's it. In theory at least, because beyond this, the Vendée Globe is the stuff of legends.

Fabrice Amédéo is looking forward to Vendée Globe 2020, where he will participate again and will sail an IMOCA with foils. For Fabrice Amedeo, there are the two dreams come true of competing in a second Vendée Globe and the purchase of this boat!

Marinepool is proud to partner up with Fabrice Amédéo in this great human and sporting adventure and provide him with the latest generation of ocean racing clothing made for the most extreme conditions, keeping the sailor warm and dry for a balanced body climate so all his focus can be directed on performance.

NORD STREAM RACE

The sixth edition 2017 of the event was billed as "Nord Stream Race – Reloaded". The new qualification system for the Nord Stream Race is tied to the National Sailing Leagues. The strongest Yacht Clubs of the Baltic prepare for 1000 Mile competition in rebooted Nord Stream Race.

In 2018 the best yacht clubs of the National Sailing Leagues from the Baltic countries will be competing again at the relaunched Race. The national champions of the Sailing Leagues in Germany, Denmark, Sweden, Finland and Russia qualify for the Nord Stream Race with their respective titles from the previous season.

From June to the beginning of July, the 1,000 nautical mile race course follows the Nord Stream pipeline from Kiel to Saint Petersburg, with stopovers in Copenhagen, Stockholm and Helsinki. The goal of this revised format for the Nord Stream Race is "Connecting Baltic Nations through Sport". Sponsored by Nord Stream AG and Gazprom in cooperation with the Saint Petersburg Yacht Club, the Nord Stream Race has been held annually since 2012. Initially, the regatta connected Russia and Germany, with the route following the Nord Stream Pipeline after which the competition was named.

Main organizer Saint Petersburg Yacht Club is holding the new edition of the long- distance regatta through the Baltic Sea together with Konzeptwerft Holding GmbH from Hamburg, the marketing agency that launched the new concept, and which remains focused on developing innovative formats in sailing. Marinepool is proud to be part of the rebooted Nord Stream Race 2017 and will give the optimum support by professional offshore clothing to the sailors and organizers. Nord Stream Race

Oliver Schwall, CEO of Konzeptwerft Germany (Lead agency Nord Stream Race): "We're living in a politically crazy world, but we know sports can cross borders and barriers. I think what we did with Nord Stream in creating this race, connecting cultures, countries, this to me is the most exciting part of what we did with this race. We had so much friendship and hospitality between the hosting clubs. The sport in general can be proud of what it can achieve, in ways perhaps that other sports can never do."

BE SEEN, BE FOUND

LUME-ON™

The groundbreaking Lume-On™ technology is illuminating the inflated air chamber in order to increase the visibility of the user.

The effect of the LED lights is increased through the neon-colored buoyancy chambers that catch the attention of potential rescue people. Lume- On^{TM} is located on the bottom of the chamber and is activated as soon as there is water contact. Once activated, the lights will be blinking intensively up to eight hours.

This new developed lifejacket sets new milestones in terms of safety.

Possible rescue vests with Lume-On™: ISO 180N Classic, ISO 220N Sport, Premium 180/300N and ISO Pro 180N/300N.

OMAN SAIL

The partnership with Oman Sail goes back to 2011. Marinepool is the of official clothing supplier to the Oman Sail organization and thus of the mentioned Oman Sail events and all Oman Sail racing teams, from Olympic and dinghy classes to the leading Extreme Sailing Series™ catamaran "The Wave, Muscat", EFG Sailing Arabia - The Tour, Oman Sail M34 and last but not least the impressive MOD70 Oman Air − Musandam.

Established in 2008, Oman Sail is a national initiative that uses the power of sport to con-

tribute to the development of the Omani people. The equal opportunity project runs sailing programmes for thousands of young Omani men and women, inspiring a new generation to discover sailing. It encompasses a national sailing squad and high achieving inshore and offshore racing teams, all of which benefit from world-class coaching and whose ultimate objective is to win an Olympic medal for Oman. The goal is to rekindle Oman's maritime heritage while raising the country's regional and international profile as a high-end tourist and foreign investment destination, through competitive sailing

at home and abroad. Oman Sail seeks to instill confidence and to teach valuable, transferable life skills to a generation of Omanis.

Marinepool is the official clothing supplier to the Oman Sail organization and thus of the mentioned Oman Sail events and all Oman Sail racing teams, from Olympic and dinghy classes to the leading Extreme Sailing Series and last but not least the GC32 Racing Tour and Class 40.

Damien Seguin is now an Olympic legend. The French skipper has won the Gold in the Rio 2016 Paralympic Games and he had already done so in 2004 in Athens and won silver in Pekin in 2008.

יטווטטווטי

Always up for new challenges, he is now aiming at the solo round the world race Vendée Globe 2020.

DAMIEN SEGUIN (FR)

He is determined to show everyone that a small "difference" is not an obstacle to great performances.

The sailor is enthusiastic about all projects as soon as they are related to sailing and high level competition with valid and/or handicapped athletes.

For this reason, he will participate in 2017 to the Tour de France à la Voile that gathers the best sailors in France with only one objective: the victory!

damienseguin.com

TECHINFO TEMPERATURE CONTROL SYSTEM (TCS):

basic layer: the basic layer (e.g. efficiency underwear) is worn directly on the skin and is most often made from non-absorbing synthetic fibre to insulate and transport the vapour away from the skin. never use cotton underwear as it will absorb the sweat causing a chilly and damp feeling.

insulating layer: the insulating layer is the middle or 2nd layer, you can choose from a wide range of garments or fibres. nowadays mostly synthetic fibres like polyester or natural fibres like Merino wool are being used as they insulate even when wet.

outer layer: this layer has three main tasks: 1. protect the middle layer from humidity (waterproof), 2. transport the humidity away from the mid layer (breathable), 3. stop the wind to prevent temperature loss (windbreaker)

Official Clothing Partner

DEUTSCHE SEGEL-BUNDESLIGA - THE GERMAN NATIONAL SAILING LEAGUE

In 2013 Marinepool partner Konzeptwerft introduced a new innovative concept to sailing in Germany: Deutsche Segel-Bundesliga – a national sailing league for yacht clubs.

Deutsche Segel-Bundesliga is the official German yacht club championship, sanctioned by the German Sailing Federation for the national title. The format resembles other sports championships. The best 36 yacht clubs of the country (selec-

ted through qualifiers and the previous season's results) sail against each other in several events around the country and in two separate leagues of 18 clubs. Races are sailed in groups of 6 on one design yachts provided by the league in up to 45 races per weekend. The top clubs of the second league qualify for the 1st league the following year, new entries into the second league are determined in a qualifying regatta open to all clubs of the country.

A consistent performance all over the season is the secret to success in order to top the scores at the end of the season as no discard is allowed.

Marinepool is on board of Segel-Bundesliga as the "Official Clothing Supplier" of the championships and with team kit for the organizers and on the majority of the competing yacht club teams.

Riff Drirelease Polo Women

Art.-No. 1004259 XS - XXL

Fabric 85% polyester, 15% cotton

Features Soft performance tec polo made out of high quality DRIRELEASE® fabric, perfect body moisture man-

agement with soft handfeel, plain design, perfect for branding. Keeps you dry at any kind of activity.

Colours navy | grey

drirelease cotton offers a patented blend of 85% polyester hydrophobic (water repelling) fibers and 15% natural cotton hydrophilic (water absorbing) fibers.

The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly. That's why clothing always feels soft and stays dry.

drirelease cotton fabric dries 4x faster than normal cotton.

Hybrid TEC

Hybrid TEC jackets are a new generation of garments which bring together the advantages of softshell jackets with the positive qualities of conventional waterproof jackets.

The fabrics used in Hybrid TEC jackets have the same typical soft feel of softshells, are flexible like them and offer their excellent thermal insulation. They are mechanically robust, while at the same time they protect reliably from weather influences with a high performance membrane that makes garments using Hybrid TEC fabrics highly breathable and totally waterproof. Contrary to softshell jackets these new jackets have fully taped or welded seams, thus providing waterproofness all around.

The result are all-purpose jackets for outdoors and sport which are super comfortable and light weight like a soft-shell but with the highest possible protection from the elements

The Best of Two Worlds.

GANESHA

Ganesha is a 46m Vitters built superyacht designed for cruising and racing. Named after an Indian deity she is a powerful yacht on the race course, while offering lavish comfort to owner and guests.

The low beam-to-length ratio, low freeboard, sleek grey hull and black tinted windows along the saloon give her a modern, elegant silhouette and balanced aesthetics.

The dual purpose yacht is highly seaworthy, built from

aluminium and features a lifting keel, carbon spars and the latest sail technology. Ganesha is capable of speeds nearly matching true windspeed making her a formidable contender with top finishes in all the races she entered in 2015.

Designed for highest level performance and efficiency she has the soul of a racing yacht yet doesn't compromise comfort in any way and, the perfect luxury sailing yacht equally comfortable with family cruising as she is with taking on an adrenaline packed regatta.

MERINOWOOL

Natural fibre - Merino wool is a natural, biodegradable and renewable fibre, making it the perfect choice for those seeking clothing that has a minimal impact on the environment.

Merino fiber can absorb up to 35 per cent of its dry weight in moisture vapor. Therefore, in hot climates or during strenuous exercise, a Merino garment close to the skin actively transfers moisture vapor molecules away from the body.

This causes the micro-climate above the skin to become less saturated with vapor, while reducing the formation of sweat droplets on the surface of the skin.

Merino garments protect the wearer from extremes of temperature (hot or cold) because they offer superior insulation and breathability in comparison with other fabrics of similar structure and weight.

LEONARD MERINO II Midlayer Jacket

Art.-No. 5003204 XS, L – XXL

Fabric 70% polyester, 20% merino wool,10% elastane

Features Warm and high stretchable midlayer jacket with a soft brushed fleece inner side. This jacket is absolutely breathable

and lightweight, feels like a second skin by perfect shaped

seams and fit.

Colour black

EFFICIENCY UNDERWEAR

ACTIVE BASE LAYER

Marinepool Base Layers are helping you to maintain your performance regardless of weather conditions or activity level.

They can be worn for active sailing in warm conditions or as base layers under other layers.

Marinepool Base Layers are high wicking with low water absorption due to the polyester/polypropylene fibres. Moreover they are ultra light weight, while offering exceptional thermal comfort and effectively protect the skin from damaging sun rays. The combination of these innovative fibres with elastane produces a close-fitting comfortable garment with exceptional stretchy characteristics, ideal for all kinds of sports.

The virtually seam free construction allows for body mapping technology with strategic vent zones, areas of warmth and 3D protective knit. Mesh areas under the arms and the warmest body areas guarantee optimal breathing. Areas which need cushioning such as shoulders and knees have a more dense structure to increase protection. Ergonomic construction at the armpit and shoulder leads to even greater mobility. A tight fit on the sides prevents from bothersome folds.

The new generation of base layers actively supports the maintenance of an optimal body climate like never before, crucial for athletes to perform at their best and for your sense of well-being.

EFFICIENCY UNDERWEAR Set

Art.-No. 1000095 XS/S, M/L, XL/XXL

The cooperation of the Austrian Sailing Federation and Marinepool as its 'Official Clothing Supplier' was the first as such partnership for Marinepool and it would probably qualify for the record books as one of the longest lasting in the sport, going back to 1996.

Since Marinepool teamed up with the Austrian Sailing Federation, Austrian sailors have won medals at European & World Championships as well as no less than three gold and one silver medal at at the

Olympic Games in Sydney/Athens and scored countless other top results.

Two years time can make all the difference and that was shown by Lara Vadlau. In Weymouth she was watching her British and Kiwi rivals take gold and silver medals while she and her crew finished a disappointing last in the 470 competition. In 2014 she was standing right in the middle of the very same two teams on top of the podium, when she won the World Championship with her new crew Jolanta Ogar.

OFFICIAL CLOTHING SUPPLIER

At the 2016 Olympic Games, the Austrian Sailing Federation left Rio de Janeiro with a bronze medal, won by sailing duo of Thomas Zajac and Tanja Frank in the Nacra 17 class.

Marinepool is looking forward to a successful partnership for the next years – as the saying goes: never change a winning team. The Austrian Sailing Federation and Marinepool go confidently into the 25th year of their cooperation!

OFFICIAL SUPPLIER

FFVOILE - FRENCH SAILING FEDERATION

MARINEPOOL, OFFICIAL SUPPLIER OF THE FRENCH SAILING TEAM

For 16 years now the French Sailing Federation has been trusting Marinepool as a clothing technical partner to offer them the best products, adapted to its many different projects. Thanks to Marinepool, the French Federation referees have appropriate outfits and they are easily recognizable by all. The coaches, on the water 300 days a year with their sailing gear, can focus on performance. For French Youth championships, the young athletes are equiped with Marinepool products, as well as clubs selected by the league to participate to the Sailing Champions League. Marinepool and the FFVoile will continue working together with the goal of always continuing the developement of the sport.

SAILING CHAMPIONS LEAGUE

After two successful years of the SAILING Champions League and three years of sailing in the league format in Europe the SCL organisers from Konzeptwerft are publishing the "National Sailing League Rule Book", the first manual for National Sailing Leagues and the SAILING Champions League.

The first version has been approved by the Steering Committee and will continuously be improved. In the SAILING Champions League the most successful sailing clubs compete against each other for a whole season in several events.

The teams with its best sailors of the clubs compete against each other to win the title and the trophy.

The competition between the best and prestigious sailing clubs in the world guarantees a high-class sailing event!

A decisive final day in the SAILING Champions League final saw the team from the hosting club Yacht Club Costa Smeralda (YCCS) claim the title of Best Sailing Club 2017.

As a cooperation partner, we are looking forward to season 2018 with the SAILING Champions League!

Tested

developed and produced in the EU

The new range of lifejackets provide fantastic protection. Approved to the ISO standards which all newly designed lifejackets must meet.

"yacht" magazine, Germany, issue12-12 Marinepool 300N Premium

Test winner 5 out of 5 stars

"Fully equipped, convincing and great performance" "Turns quickly and relaible, very bright LED sea light" First out of 14 jackets tested.

Waterkampionen, Holland, March/April 2013 Marinepool 300N Premium

Test winner

"This Lifejacket delivers both good performance and is also very complete"

First out of 12 vests tested.

Trailer Boat magazine, Australia, May 2011 Marinepool 180N Premium

10 out of 10

"This is a quality product designed to last and with good safety features"

First out of 8 vests tested.

Vene magazine, Finland, February 2013 Marinepool 180N Premium

"Highly recommended"

"Secure turning and especially good freeboard and body angle"

"yacht" magazine, Germany

Marinepool 180N Racer Plus

4 out 5 stars, Marinepool 180N vest in a 275N review

Beating most of the 275's on test although it's just a 180N vest!!! "Very short activation time, well designed operating head pocket, compact buoyancy, good swimming position"

Vene, Finland, February 2013 Marinepool 180N Pro

Test winner, 5 out 5 stars

"Surprisingly the clear test winner by some way"
"Turned all subjects in ALL conditions and the floating
position was constantly and excellant one"
"One of the most comfortable jackets we ever wore"

Icjkuriren, Sweden

Marinepool 180N Pro
June 2013
"High buoyancy, turns fastest in the water"

And the winner is.

ISO 12402

Products newly designed, developed and introduced to market will be approved to ISO12402. These standards are intended to ensure that all lifejackets sold meet very stringent requirements regarding the design, performance, materials and components used and even give guidelines regarding the information to be provided to the customer about the lifejacket.

- More stringent test criteria meaning lifejackets have to be far superior in every way
- All components must be individually approved then assembled together and approved as a lifejacket
- Annual surveillance testing for safety harness and a 5 year certification for the product meaning every 5 years it needs renewing
- Accepted worldwide (except USA)

All of the above have 1 outcome. A superior performing product in every possible way. Marinepool lifejackets providing unrivalled comfort, security and support for users. Designed to outperform the ISO 12402 requirements, providing increased performance in the most demanding of environments.

The Hammar Standard System

Some big-benefit features of the Hammar manual/automatic lifejacket inflator

- unique hydrostatic valve that protects the water sensitive element. No activation in rain, spray, splash and humidity (1)
- single point indicator (green) shows that the inflator is ready for use (2)
- cylinder seal indicator (green) ensures that the cylinder has not been used (2)
- gas cylinder located inside the life- jacket bladder. Cylinder protected against corrosion, reduces snagging hazard (3)
- no service requirement of the inflator cap for 5 years.

The manual/automatic version works like this: when the inflator is lowered more than about 4 inches in the water, then the hydrostatic valve opens and lets the water meet the water sensitive element (4a), that in turn releases a stainless steel coil spring. The spring then drives a needle into the end of the gas cylinder, which is now punctured so that the gas instantly fills the lifejacket (4b). total buoyancy is normally reached within 4 - 5 seconds.

If you want to test your lifejacket in water, you can do this without activating the inflator. Just inflate your jacket through the oral tube and then go swimming. The counter pressure inside the bladder will prevent the hydrostatic valve from opening! That way you will not use up your gas cylinder. After your swim, let the jacket dry off, and then deflate it.

For rearming instructions please check www.marinepool.com

EFG SAILING ARABIA - THE TOUR

Launched by Oman Sail in 2011, EFG Sailing Arabia – The Tour was designed to reignite the Gulf region's maritime heritage by celebrating the fast-growing sport of sailing and the opportunities that it represents. The regatta is also an opportunity to showcase the beautiful region as the ideal winter sailing destination and present its offerings as an international stage for high-calibre sailing events.

EFG Sailing Arabia – The Tour offers a unique insight into the Sultanate of Oman's culture, making the event an incredible adventure that goes far beyond offering fast and furious sailing.

The cultural and educational elements of The Tour add an entirely new aspect; crews, teams and sponsors will explore the breath taking landscapes and mystical traditions of Oman as a tourist destination, with local guides creating an incredibly safe, informed and interesting environment.

2018 marks another milestone, with the introduction of Diam24 as the official class. The 8th edition of EFG Sailing Arabia – The Tour will be a new, multi-stage event that showcases the beauty of the Sultanate of Oman from 3rd to 17th February 2018, featuring:

4 Inport Races / 3 Coastal Raids / 3 Offshore Legs

Marinepool is an official event sponsor and supplies the majority of the teams with performance sailing clothing and safety equipment.

Marinepool is "Official Clothing Supplier" to the Rose of Charity Sailing Cup

The Rose of Charity Sailing Cup (RoC) is not just a sailing regatta, it is more like a flotilla trip and a TV lifestyle event that uses sailing yachts as a platform for messages of social engagement and commitment to the environment. The Cup shows the commitment of German movie and television actors as well as partners and sponsors in a unique and easy way. It translates the involvement of the participants, in close relation with the actors of the RoC Sailing Team, into a powerful, emotional event where everybody wants to be part of.

Actors, partners, sponsors and guests sail against each other on 25 yachts – one week on sailing yachts in the Mediterranean. Sailing as an attitude to life and a strong message: only together can you change things, move them!

The Rose of Charity was created by actors and the team of ARD BRISANT 2013.
