NIA Foam construction for maximum protection
SPECIFICALLY DESIGNED TO ABSORB IMPACT AND
REDUCE TRANSFER THROUGH TO BODY

NIA FOAM TECHNOLOGY

Magic Marine's NIA uses Nitrile Impact Absorption technology to absorb and reduce impact. The construction has been tested and developed alongside specialist teamriders to produce the best protection. Through the clever panel layout of the NIA construction, it is able to flex in all directions maintaining movement and agility for the sailor. The type of foam used is dense and optimised to absorb the impact load applied.

TECHNICAL PAGES & GENERAL CONDITIONS

FABRICS

-FOUL WEATHER GEAR-

We have developed our range of outer shell materials to provide the best comfort and protection from the outside elements. whatever conditions are given we have it covered.

MTECH PERFORMANCE TECHNOLOGY

For extreme performance in the most challenging of situations on the water. The advanced MTECH PERFORMANCE TECHNOLOGY materials have been engineered to provide the best comfort, breathability and performance for any conditions thrown at you.

MTECH PROTECTION TECHNOLOGY

When protection is important we have it covered. The MTECH PROTECTION TECHNOLOGY material range is our basic range of materials designed to keep you dry, comfortable and protected from the elements.

MTECH2.0

MTECH2.0 uses a 2Layer fabric designed and tested to keep you dry and comfortable in a range of conditions. The construction utilizes a durable woven outer layer to repel water and provide abrasion resistance, with a polyurethane (PU) inner coating to pull body moisture towards the outer layer. This is then complimented with a soft free flowing lining to further extend the breathability and comfort of items using this fabric.

The fabric is constructed in the following layout:

1. Moisture wicking soft lining
2. PU mid-layer
3. Waterproof woven outer layer

This breathable, waterproof and windproof protective shell features taped seams for added protection, and is ideal for extreme weather – cold, wet and windy days.

MTECH2.5

MTECH2.5 uses a similar principle to a 3Layer matrix, however by reducing the thickness of the third layer, it allows the material to be lighter, more breathable and easily packable. MTECH2.5 utilizes a polyurethane (PU) inner coating with a specialized print pattern designed to wick moisture away from the body leaving a dry-touch, ½Layer coating. This ½Layer print separates the PU coating from the skin, creating ventilation and extending the materials durability and comfort properties. It also eliminates the need for a lining layer.

The material is constructed through:

1. Moisture wicking, abrasion resistant inside print
2. PU mid-layer
3. Waterproof barrier layer

This lightweight breathable, windproof and waterproof membrane makes products that use MTECH2.5 ideal for warmer days, without the added weight.

MTECH3.0

MTECH3.0 uses a 3Layer fabric designed and tested to keep you dry and comfortable in a range of conditions. The construction utilizes a durable woven outer layer to repel water and provide abrasion resistance, a polyurethane (PU) mid-layer to pull body moisture towards the outer layer, and a comfortable inner layer to provide breathability by channeling moisture to the micro-pores of the mid-layer.

The material is constructed by:

1. Moisture wicking inner layer
2. PU mid-layer
3. Waterproof woven outer layer

MTECH3.0 products are designed to keep you comfortable and stay dry from the inside and out.

FABRICS

-WATERWEAR-

MFLEX NEOPRENE

Magic Marines' neoprene gauge used throughout our product range to show the amount of flexibility in our suits. Ranges from MFLEX100% which provides extreme flexibility and comfort, ideal for high movement sports, to MFLEX30% has less stretch used on suits where flexibility is not as important.

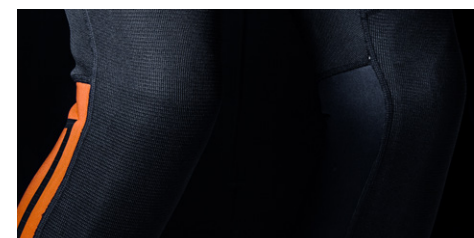

SUPERSTRETCH NEOPRENE

High stretch neoprene that offers minimum resistance with extreme comfort and freedom of movement, whilst allowing for a tight fit. Constructed from a rubber inner core with a high stretch nylon laminated on the outside, and a high stretch lining on the inside. Used in areas on our suits that require maximum movement.

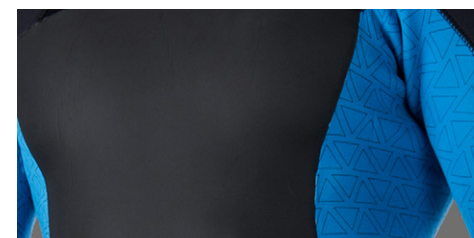

STANDARD NEOPRENE

Durable neoprene made from a rubber layer sandwiched between 2 layers of nylon fabric. Perfect for parts on the suit that require less stretch. Works well as a combination fabric on sailing suits where different stretches are used, for example, to bridge the gap between superstretch neoprene and 4WaySupertex to limit degradation, and improve the performance of the suit.

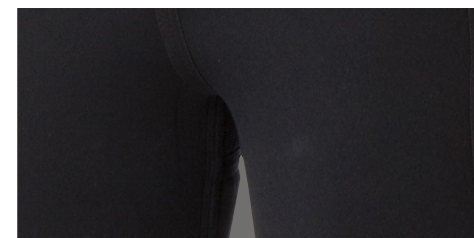

4WAYSUPERTEX

Strong, abrasion-resistant material constructed from nylon weaved in a 3D knit construction, which maintains stretch and flexibility. Used in high abrasion areas to prolong the life of your wetsuit.

FINE MESH SKIN

Wind- and water-resistant neoprene 'rubber like' outer skin that prevents evaporative cooling due to water absorption, which is common to standard neoprene. Constructed through a nylon 'rubber like' finish on the outside, and an open cell neoprene on the other - ready for a lining application. Used on core parts of our products to protect and maintain a core body temperature.

AIRPRENE

Matrix of 3 layers, where the mid layer features small holes sandwiched between 2 nylon layers. Provides increased breathability, through its open cell structure whilst extending its stretch and flexibility properties.

AIRSTRETCH

Fast drying, moisture wicking material that is used in areas where cooling and dryness matters the most, to ensure the best comfort. Works in unison with your body and the particular conditions present to help to regulate temperature, moisture and also offers UV50+ protection.

LININGS

-FOUL WEATHER GEAR-

The lining used in your foul weather gear is an important feature to keep you dry and comfortable. Where the outer shell protects you from outer moisture, the lining protects you from inner moisture, in turn improving the breathability of the product. At Magic Marine, we have carefully chosen and developed linings to maximise your comfort in each of our products, and improve their performance.

MOISTURE WICKING LINING

Moisture wicking linings are used in our products to keep you dry and comfortable; developed to wick moisture away from the body. The structure of the lining has 2 surfaces, where moisture is transferred from the inner surface to the outer surface taking any sweat/moisture away from the body, leaving you dry and ready to perform. This lining is used in most of our MTECH2.0 products, and is constructed from a combination of mesh and nylon.

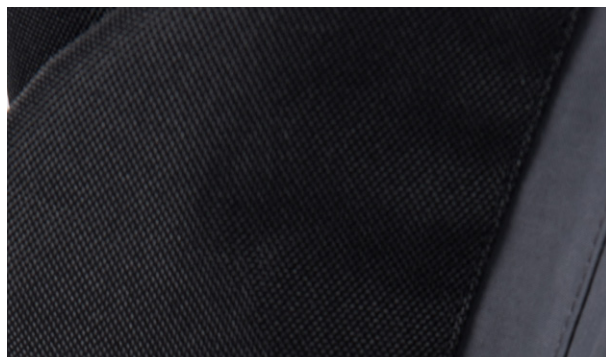

PU PRINT LINING

An abrasion resistant print applied on the inside of our MTECH2.5 fabrics. The specialized print pattern has been developed to wick moisture away from the skin towards the outer layer, to keep you dry and comfortable. The print works by creating a ventilation channel between the PU mid layer of the shell fabric and your skin.

REINFORCEMENTS

-FOUL WEATHER GEAR-

In order to maximise the performance of the products, we use reinforcements where necessary to prolong their lifecycle and improve durability.

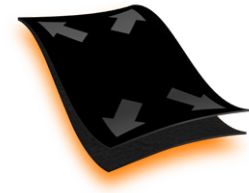

CORDURA®

Cordura® is used in our drysuits and certain foul weather gear products to enhance their tear and abrasion resistance and promote long lasting durability. The fabric is produced using INVISTA yarns woven in a 2x2 basket weave construction to create a densely woven, high strength nylon fabric.

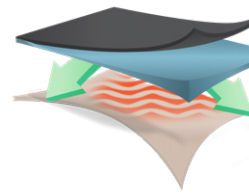

LININGS

-WATERWEAR-

BIPOLY

Bipoly is a double base layer for underneath your Foul Weather Gear or Drysuit. It keeps it's warmth function, even after it gets wet. The Inside Layer is a soft brushed fleece lining to provide warmth and a soft layer directly on the skin. The outside Layer / Heavy quality nylon (soft touch) with spandex to provide substantial stretch. UPF sun protection of 50+ and quickdry feature.

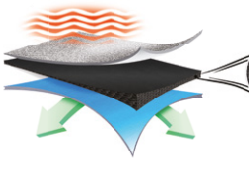

MERINO LINING

Naturally warm, odor-resistant and antibacterial lining with body temperature regulating properties. Traps a heat layer against the body, and maintains this layer even when wet. Proved to offer a 35% increase in thermal efficiency, in dry and saturated conditions over comparable synthetic linings.

QUICKDRY LINING

Lightweight, soft, hydrophobic lining with a specialized structure designed for fast drying, to improve comfort and warmth from cold wet conditions. The quickdry lining has high stretch properties with a unique square module pattern to allow for air to circulate freely extending its performance.

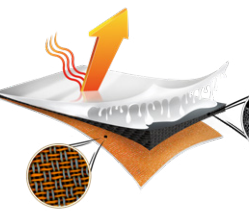

POLAR LINING

Soft, non-itch, hydrophobic, thermal fleece lining. The polar lining acts as a barrier that repels water molecules from penetrating through from the neoprene outer layer to the body, whilst holding less than 1% of its weight in water. Adds performance to our thicker neoprene products.

XTEND LINING

Soft and comfortable, non-itch lining specifically used with superstretch neoprene to extend its flexibility properties. Provides approximately 250% more stretch than standard nylon. Adds performance to our lightweight neoprene products.

METALITE LINING

Titanium coated lining that reflects heat back to the body and helps to regulate body temperature in both warm and cold conditions. Smooth metalite lining enables extremely lightweight products to be developed with great flexibility when wet, and its UV properties make it ideal for sunny conditions.

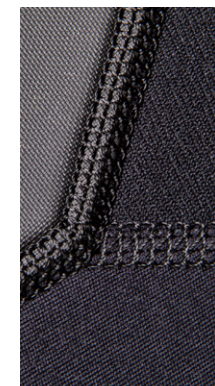

STITCHING

-WATERWEAR-

GBS

Glued blind stitching is mainly used in our winter and cold weather suits. This way of stitching involves gluing two panels end for end; these are then stitched on the inside, however the stitching does not go all the way through to the outside panels of the neoprene. This results in an extremely watertight and flexible seam, which limits water penetration through to the inside of the suit, making it ideal for suits where warmth is a top priority. On some of our suits, we reinforce this further with a tape to further improve warmth and comfort to the user.

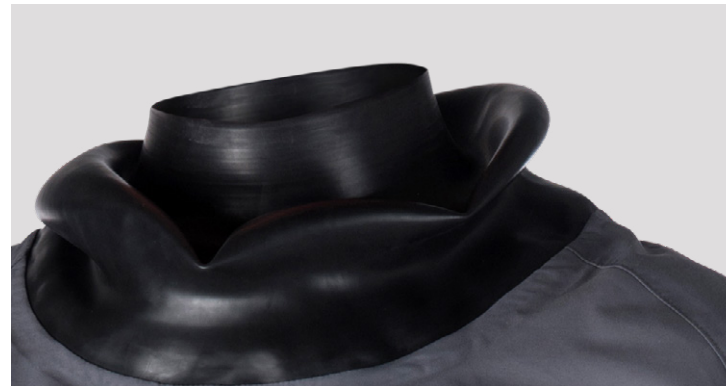

FLATLOCK

Flatlock stitching is often used on wetsuits in our range 3mm or lower. It is constructed by laying one panel edge over another, and then stitching through both layers of neoprene. This way of stitching results in a very strong and flexible join, however due to the amount of stitching holes allows water penetration, which makes it more suitable for thinner, summer suits.

FEATURES

-FOUL WEATHER GEAR-

LATEX NECK

Strong neck to provide maximum protection from water inlet through the neck
- used on our waterproof products.

PU TRICOT CUFFS

Soft polyurethane tricot cuff that adds a seal to stop water inlet. PU coating provides a durable waterrepellent finish to the strong tricot (zigzag) knit fabric.

FLEECE COLLAR

Soft microfleece lining on our high neck products to prevent chin rash and add comfort and warmth.

STOWAWAY HOOD

Reflective hood with peak construction that can be rolled away when not in use and stowed under a wide neck collar - to keep out of the way.

ZIPPER GUARD

Material guard positioned behind zipper to further extend the waterproofness of the zipper.

DOUBLE CUFFS

Double cuff construction, where the outer shell material cuff has a Velcro adjustment, which is then further supported by a soft PU coated inner cuff to provide a seal against your skin for further water protection.

REINFORCED PANELS

Strong, hardwearing panels that are placed in parts that are exposed to high levels of abrasion. Improves durability of the product.

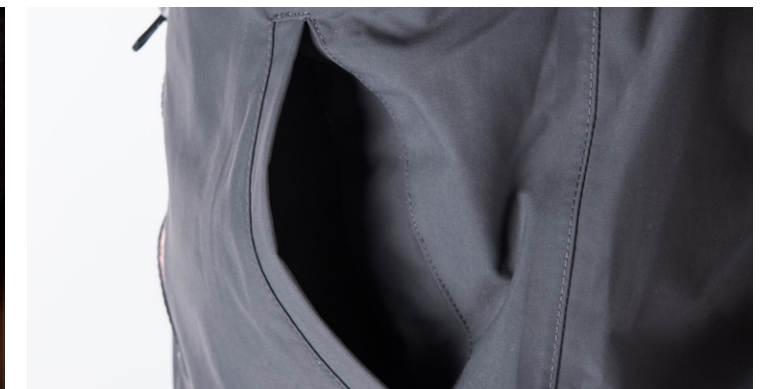

WATERPROOF STRETCH TAPING

Every seam is taped to provide ultimate protection from water penetration extending the products performance.

WICKING LINING

A lining that wicks moisture away from the body. The structure of the lining has 2 surfaces, where moisture is transferred from the inner surface to the outer surface keeping you dry and comfortable

FLEECE LINED POCKETS

Soft microfleece lining on the inside of pockets to keep your hands warm.

DOUBLE ENDED ZIPPER

Used on all our jackets, the zipper that can be opened from the top or the bottom. Good for repositioning of clothes and access to underneath layers.

REFLECTIVE PRINTS

Low bulk reflective prints to add a safety feature to the products.

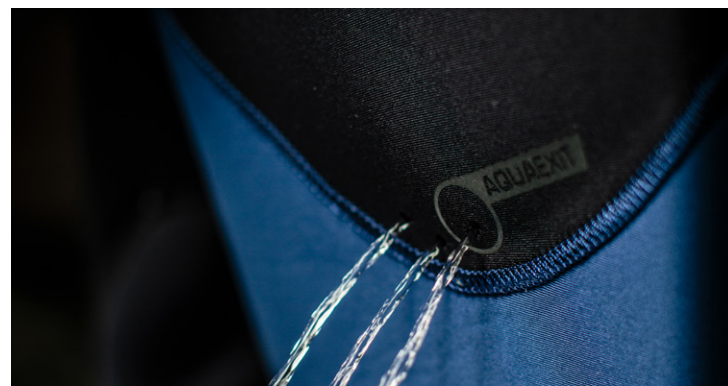

FEATURES

- WATERWEAR -

GLIDESKIN NECK

Soft and comfortable neck that seals to your neck to limit water from entering into the wetsuit.

AQUAEXIT

Drainage system to allow water to flow freely out of the suit. Positioned in several key areas to add comfort and performance.

PK COATED ZIP

Hard wearing, durable PK zip coated to extend its capabilities, and and create a better seal. Used in combination with a stainless steel zipper to add longevity to the suit.

CRITICAL TAPING

Neoprene taping positioned at critical seams and seam joins to prevent water penetrating through.

WATERPROOF STRETCH TAPING

Highly durable taping used on the inside of the suit at seams to limit water penetration, providing heat whilst maintaining flexibility.

BACKUP SHIELD

Neoprene guard on the inside of the back zipper placed in wetsuits to add comfort and limit water penetration.

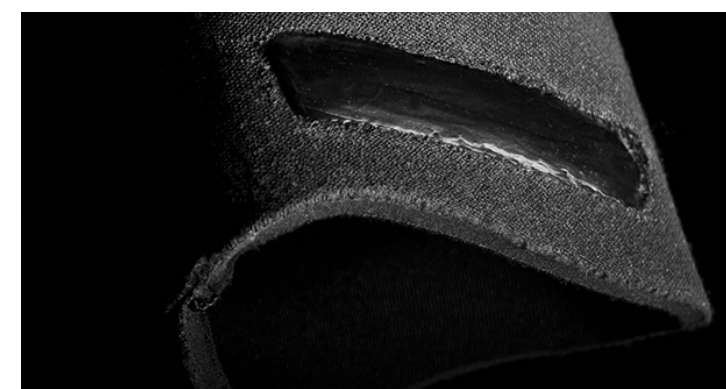

RELIEF ZIPPER

Relief zipper built into mens wetsuits for long days on the water.

PROPAD ATTACHMENT

Internal plush material placed on inside of wetsuit at upper back legs that allows for the attachment of our 'Pro Pads' to convert the wetsuit into a hiking suit.

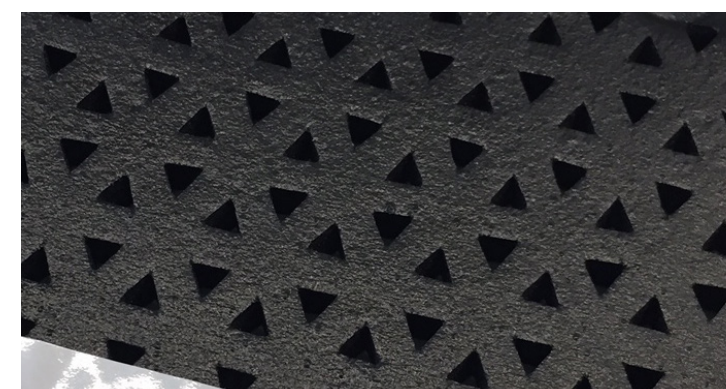

NON SLIP CUFFS

Silicon print placed on inside of the cuffs to maintain the position of the wetsuit and limit water entering.

KNEE/SHIN PROTECTION

Additional EVA foam padding on inside of suit to add protection to knees/shins.

NIA FOAM PADDING

NIA (Nitrile Impact Absorption) foam is a 6mm high density PET foam, that absorbs impact in high impact situations. It has a low water absorption rate and the specifically sized NIA foam panels are flexible, and have been developed to move with your body and provide support.

MAGICMARINE ID

Magic Marine ID has been developed so that the product can be personalized; with a large clear area, you can write your name or team name, using the grid squares in the strong anti-rip material to align the letters, and make it neater.

GENERAL CONDITIONS WATERWEAR AND LIFESTYLE

GENERAL CONDITIONS OF DELIVERY AND PAYMENT
GENERAL CONDITIONS OF SALE, DELIVERY AND PAYMENT OF NORTH ACTIONSPORTS GROUP OF KATWIJK,
IN THE NETHERLANDS. ALL PRICES IN EURO. ALL PRICES UNDER PROPER RESERVES.

Article 1: Applicability of these conditions

- 1.1 All proposals shall be made with the declaration that these general conditions of sale, delivery and payment shall apply both to the proposal and the acceptance thereof, and to the agreement thus established.
- 1.2 General conditions (of purchase) of the client shall only apply where it is expressly agreed in writing that these apply with the exclusion of these conditions of supply to the agreement between parties.

Article 2: Proposals, quotations

- 2.1 All proposals shall be without obligation unless these contain a period for acceptance. Where a proposal contains an offer without obligation, we shall have the right to revoke the offer within two working days of receipt of acceptance.
- 2.2 In case of composite price quotations there shall be no obligation to deliver a part for the corresponding part of the price indicated for the whole.
- 2.3 Where reservations or modifications with respect to the proposal are included in the acceptance, as an exception to the provisions of Article 2.1, the agreement shall only come into being where we have notified the client that we agree to these deviations from the proposal.
- 2.4 If no order is placed after the proposal requested, the costs of this may only be charged where this has been agreed.
- 2.5 For additional and extra work for which no price has been agreed the price to be paid shall be calculated on the basis of costing.

Article 3: Prices and price changes

- 3.1 All prices indicated shall be exclusive of value added tax (VAT) and other levies imposed by the Authorities.
- 3.2 The price which we indicate for the service to be performed shall only apply for such service and not for the dispatch and transport costs etc.
- 3.3 We shall be entitled to increase the agreed price if one or more of the following circumstances occur after signature of the agreement: increase in the costs of materials or services which are necessary for the execution of the agreement, increase in dispatch costs, wages, employer's charges and social security contributions, in the costs involved in other conditions of employment, introduction of new and increase in existing government levies on raw materials, energy or waste, an appreciable change in foreign exchange rates or, in general, circumstances which are comparable with all these.

Article 4: Delivery method; reservation of ownership

- 4.1 Unless otherwise agreed delivery shall be made to the place where we carry on our business.
- 4.2 We shall not be obliged to carry out delivery in parts.
- 4.3 The client shall be obliged to give his full cooperation to the delivery of the goods to be supplied by us in accordance with the agreement. The client shall also be in default without being given notice thereof where he does not collect the goods to be delivered from us after our first request or where a delivery to his address is agreed, he refuses to take receipt of the goods.
- 4.4 Any delivery of goods by us to the client shall be made on reservation of title thereof, until the client has paid everything to which he is obliged under the agreement, including interest and costs.
- 4.5 Where transport of the goods to be delivered is agreed, this shall be for account of the client, unless free delivery has been agreed. The client shall only bear the risk during transport. The acceptance of goods from us by the carrier shall be deemed evidence that these are in an externally good condition, unless the contrary is shown by the consignment note or the receipt.
- 4.6 We shall not be responsible for the storage of the goods to be delivered, unless this is expressly agreed. Where storage is carried out, this shall be for account and risk of the client.

Article 5: Delivery period

Delivery periods indicated shall never be regarded as deadlines, unless otherwise expressly agreed. In case of late delivery we must therefore be given written notification of default.

Article 6: Partial delivery

Any partial delivery, including also the delivery of components of a composite order, may be invoiced. In such case payment must be made in accordance with Article 8 'terms of payment'.

Article 7: Check upon delivery

- 7.1 The client shall be obliged to check with appropriate speed after delivery whether we have satisfactorily fulfilled the agreement and shall also be obliged to notify us immediately in writing, should he find the contrary. The client must carry out the check just mentioned and give the relevant notification at the latest within 24 hours of delivery.
- 7.2 We shall always be entitled to provide a satisfactory new service in place of a previous unsatisfactory service, unless the default cannot be remedied.
- 7.3 The fulfillment of the agreement shall be regarded between parties as satisfactory where the client has been in default of promptly carrying out the check or the notification as referred to in paragraph 1 of this Article.
- 7.4 Where the period of 24 hours referred to in the first paragraph of this article in accordance with criteria of reasonableness and fairness must also be regarded as unacceptably short for a careful and alert client, this period shall be extended at the latest until the first time when the check or the notification given to us by client is reasonably possible.
- 7.5 Our service shall in any case be regarded between parties as satisfactory where the client has taken into use, treated or processed, or delivered to third parties the goods delivered or part of the goods delivered or had them taken into use, treated or processed or delivered to third parties unless the client has taken into account the provisions of the first paragraph of this article.

Article 8: Terms of payment

- 8.1 Payment must be made upon delivery in cash, unless otherwise expressly agreed in writing.
- 8.2 Where a discount for cash payment is agreed, this may only be deducted from the invoice amount where paid within the agreed period and where at the time of the application of the discount there are not any other unpaid invoices.
- 8.3 From the due date the client shall owe interest on the invoice amount of 1% per month or part thereof.
- 8.4 The demand for payment of the purchase price shall be immediately payable if the client is declared bankrupt, applies for suspension of payment, an application for placing under restraint is pending, any attachment is made on goods or receivables of client, client dies or where this is a partnership, a private limited company or a public limited company, it goes into liquidation, is dissolved or acquires another partner.
- 8.5 Where the client is in arrears with any payment - even where this is the result of another agreement - then all amounts to be paid by him to us shall be payable up to the full amount, irrespective of the status of the orders and we can demand immediate payment thereof. In that case the execution of any order given by this client is to be suspended until payment is made within a period to be set by us which has become payable in case of the previous sentence. Where payment has not been made within this period, we shall be entitled to cancel all orders of that client, notwithstanding all rights to compensation as provided in case of 'cancellations' in Article 10.
- 8.6 Any suspension of payment granted may be withdrawn by us at any time.
- 8.7 A payment is regarded as received once the amount in question has been credited to the account indicated or have been handed over in cash.
- 8.8 A payment made by the client shall always cover all interest and costs owing and then invoices payable which have been outstanding the longest, even where the client indicates that the payment relates to a later invoice.
- 8.9 All costs, both extrajudicial and judicial, including the costs for solicitors, bailiffs and collection agencies, incurred with regard to the collection of the amount payable by the client and not paid promptly shall be for account of the client. They shall be fixed at a minimum of 15% of the amount in question and shall amount to at least 150 Euro.

Article 9: Retention right

We shall be entitled to hold onto the goods of the client on our premises until payment of all costs, which we have incurred to execute orders from this same client, unless the client has provided sufficient surety for these costs. We shall also have the retention right where the client becomes bankrupt.

Article 10: Cancellations

Where the client cancels the order given in full or in part, he shall be obliged to reimburse us for all costs already incurred with a view to the execution of this order and, where we wish this, to take the goods intended for the execution of this order for his account at the prices included by us in the costing. This is all not withholding our right to remuneration for loss of profit as well as the other loss arising from the cancellation involved.

Article 11: Force majeure

- 11.1 The delivery period referred to in these conditions shall be extended by the period during which we are prevented by default which cannot be attributed to us - further indicated by force majeure - from fulfilling our obligations.
- 11.2 There is a question of force majeure on our part where after signing the purchase agreement we are prevented from fulfilling our obligations arising from this agreement or preparing for them as a result of war, danger of war, civil war, revolt, war risk, fire, water damage, flooding, strike, occupation, lock-out, import and export barriers, government measures, faults in machinery, disruptions to the energy supply, all both in our company and at third parties, from whom we have to obtain all or part of the goods required, as well as in case of storage or during transport whether or not under our own management, and also by all other causes which arise through no fault of ours or outside our sphere of risk.
- 11.3 Where the delivery is delayed by force majeure for more than fourteen days, both we and the client are empowered to regard the agreement as terminated. In that case we shall only have a right to reimbursement of the costs to be incurred by us.

Article 12: Liability

- 12.1 Our liability under the agreement with the client shall be limited to an amount proportionate to the agreed price in accordance with criteria of reasonableness and fairness.
- 12.2 We shall not be liable for damage of any type whatever which arises because or after the client has, after delivery, taken the goods into use, treated or processed them, delivered them to third parties or had them taken into use, treated or processed or delivered to third parties.
- 12.3 We shall also not be liable for loss in the form of loss of profit or reduction in goodwill in the company or the profession of the client.
- 12.4 Where we are held liable by a third party for any damage for which we are not liable by virtue of the agreement with the client or these conditions of delivery, client shall indemnify us in full from this and reimburse us for everything that we have to pay to this third party.

Article 13: Applicable law and disputes

- 13.1 Only Dutch law shall apply to the agreements between us and the client.
- 13.2 All disputes between parties shall be settled by the competent Court, in the district in which we are established.
- 13.3 We shall however remain authorized to summons the client before the court competent in accordance with the law or the applicable international convention.

Magic Marine riders are all aiming for a goal; no matter if it's an optimist sailor, a big boat team or a sailor who has reached the pinnacle of the sport. These sailors fight to perfect every detail during the entire journey.

We aim to be the most innovative, creative and passionate brand in the sailing industry; our products are made for sailors but also by sailors.

Without our teams and ambassadors we would not be able to reach our goals. These riders keep us updated

about what is going on in the different fleets and they test our new products during the many hours that they spend on the water.

But most importantly, these ambassadors give Magic Marine a face all around the world!

NICHOLAS HEINER, THE NETHERLANDS

MAGIC MARINE

B R A N D S T O R Y

ON THE BEACHES...

1989 - A group of avid catamaran sailors on the beaches of the Netherlands developed a desire for newer, faster boats and more comfortable, innovative clothing for on the water. At this time, Magic Marine designed a few breakthrough products to introduce the idea of innovation and comfort together with performance. Supportive harnesses with 3D shaping were launched in the marketplace and Magic Marine became the brand for performance sailing.

LAUNCHING FROM SLIPWAY...

2000 - A few years after the development in catamarans, the world of sailing experienced a trend towards the slipway. New boats required different equipment. Magic Marine developed a product range, offering lightweight summer wetsuits, lighter harnesses and full hiking gear.

SAILING FROM THE MARINA...

2009 - Magic Marine extended its collection to include a waterproof range to support the growing market of sports boats and offshore racing. Sailing included the need for clothing to use in and around the boats. The sport of sailing became "a way of life" and the products enabled the sailor to remain comfortable in any situation that presented itself.

SAILING IS EVERYWHERE

The sport of sailing is diverse and fragmented, Magic Marine designs and develops products, realising the many differences between all users. The common theme remains that sailing is a sport of passion whether it is to win a race or to be able to enjoy all conditions.

Magic Marine is sold around the world through an international sales network who are all working together with passion to support the needs of all sailors.

"Our designers listen to all sailors and combine their own sailing experiences, together follow the trends, fabrics and technical innovations in order to deliver top quality products."

VISION

Magic Marine stands for performance based sailing gear covering a wide range of disciplines. The brand pushes to be one step ahead recognizing the range of conditions that sailors are exposed to; where faster sailing, longer sessions and more extreme weather is experienced.

PARTNERSHIPS

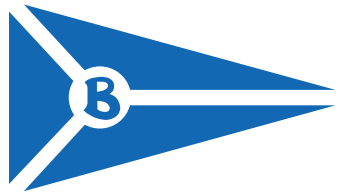

MAGIC MARINE

THE SPORT OF SAILING NEEDS FRESH NEW FACES AS WELL AS STRONG ORGANIZATIONS TO LEAD TO A BRIGHT FUTURE.

MAGIC MARINE HAS A FOCUS TO SUPPORT THE GROWTH OF THE SPORT OF SAILING. MAGIC MARINE HAS AN APPROACH FROM TWO DIRECTIONS. WE CREATE HEROES AND WE SUPPORT THOSE WHO ARE WORKING HARD TO BUILD THE OPPORTUNITY FOR NEW CHILDREN TO ENTER THE SPORT.

FROM SPONSORSHIP AS THE DUTCH OPTIMIST TEAMS, THE 49ER AND NACRA 17 CLASS, OLYMPIC TEAMS AND SCHOOLS AROUND THE WORLD; MAGIC MARINE IS DRIVEN FROM THE CORE OF THE SPORT AND GLAD TO COOPERATE WITH PARTNERS WHO SHARE OUR PASSION.
